Independent Investment Advisers

INVESTMENT SURVEY

*Meyer Capital Management maintains a strict fiduciary duty to each client we serve. This varies markedly from more prevalent buyer/seller relationships where “buyer-beware” is the underlying principal. By their nature, fiduciary relationships embody high levels of confidence and trust. As fiduciaries, we owe it to you to maintain your trust by providing professional investment advice that is objective and uniquely suitable for you, taking into account your personal financial situation, investment experience and investment objectives. The information collected in this survey is designed for this purpose.**

Please fill out this questionnaire to help us determine the types of investments that are most suited to your needs and objectives.

PART III: GOALS AND OBJECTIVES (Cont.)

3. What is your outlook toward risk? Check the response that best describes your attitude:

___ I strongly dislike risk and prefer very safe investments such as insured savings accounts and government securities.

___ I prefer low-risk investments with a known yield such as highly rated bonds.

___ I am comfortable with the risks associated with stocks and other investments that fluctuate in value but have the potential to deliver higher investment returns.

PART IV: INVESTMENT PREFERENCES

Described below are the three primary benefits that are provided to some degree by all investments. No single investment maximizes all three; receiving more of one benefit usually means receiving less of another.

1. **Safety of Principal:** The likelihood that the principal will be returned intact without increase or decrease.
2. **Cash Flow:** The amount of cash flow that the investment will generate annually.
3. **Appreciation:** The amount of gain that will be realized upon sale of the asset.

Please indicate below the benefits you desire from your investments by circling the appropriate numbers. The total of the numbers circled should equal ten.

	<u>High</u>					<u>Low</u>
Safety of Principal	5	4	3	2	1	0
Cash Flow	5	4	3	2	1	0
Appreciation	5	4	3	2	1	0

Total = 10

Listed below are three characteristics of investments. Unlike the benefits above, you can have as much or as little of each characteristic as you like without affecting the others. Trade-offs are involved, however, because each characteristic has both favorable and unfavorable aspects.

1. **Liquidity:** The ease of converting the investment to cash within a short period of time.
2. **Risk and Return:** The degree of uncertainty about the results of the investment and the magnitude of the total return. In most cases, increased risk should mean increased return.
3. **Management Effort:** The degree to which you are personally involved with the operation and decision-making aspects of the investment.

Please indicate your preferences for these characteristics below by circling one number for each characteristic (the total can equal any amount):

	<u>High</u>				<u>Low</u>
Liquidity	5	4	3	2	1
Risk and Return	5	4	3	2	1
Management Effort	5	4	3	2	1
